Education

Technological University (Hmawbi)

Electrical Engineering
(3 Years Completed)

2017 – 2020

Skills

- Mobile Development: Flutter, Dart, Hive (Local Storage)
- State Management: BLoC, Cubit, Provider
- Backend & APIs: RESTful APIs, Supabase, Firebase,
- Web Technologies: HTML, CSS, Responsive Web Design
- Tools & Platforms: Git, GitHub, Vercel,
- Core Skills: App Deployment,
- Problem-Solving
- Time Management
- Networking

Language

- Burmese: Native
- English: Upper Intermediate
- Chinese: Basic (HKS 1)

Summary

Motivated Junior Mobile Developer focused on building cross-platform apps with Flutter and Dart. Experienced in turning UI/UX designs into working applications, managing app state (BLoC, Cubit, Provider), and connecting apps to backends (RESTful APIs, Supabase, Firebase). Passionate about creating smooth, user-friendly mobile apps and always eager to learn new development skills.

Work Experience

Junior Mobile Developer

Digital Base

August, 2026 – Present

- Build and maintain cross-platform Flutter apps from start to finish, writing clean code and delivering features on time.
- Use BLoC and Cubit for state management to handle user login flows and app themes.
- Connect apps to Supabase, Firebase and backend servers for real-time data and user management.

Mobile Developer Intern

Digital Base

May 2026 too July 2026

- Built a nail salon booking mobile app for customers using Flutter.
- Worked closely with UI/UX designers to turn their visual designs into a working, responsive mobile app.
- Used the Provider package to manage the app's internal state.
- Connected the app to the backend using RESTful APIs to load data and handle user actions.

Mobile Projects

Yomi Board (Task Management App) | Flutter, Supabase, BLoC

- Built a complete Kanban-style task management app from scratch.
- Created database tables in Supabase and added secure user login.
- Used BLoC to manage the app's state, including user sessions and dark/light themes.

Cross-Platform Mini-Blog | Flutter, Hive, Vercel

- Built a responsive blog app that works smoothly on both Web and Android.
- Added features like page navigation, image uploads, and interactive reaction buttons.
- Used Hive local storage to allow users to read posts offline.
